

INTERSPAZIO CONTRACT

ABOUT US

We create positive emotions for your environments, customizing your space just as you had always imagined. Creativity is our strength. With Interspazio your dreams can come true thanks to a team of experienced professionals.

INTERSPAZIO CONTRACT

Interspazio Contract is the evolution of the renowned Interspazio SRL established in 1997 by Samir Majzoub.

The contract is the conception of a broad and structured system that allows the creation of custom made furniture and that includes all phases that make the final result satisfactory in every aspect.

It starts from the design that is done with care and creativity. Then it moves on to the practical part, the production, when ideas become reality, until we reach the logistic phase. This way, we assure a route that goes from the creation to the installation.

Relying on a contract means not having to worry about anything, except the proposing of an idea that will take life without any hindrance.

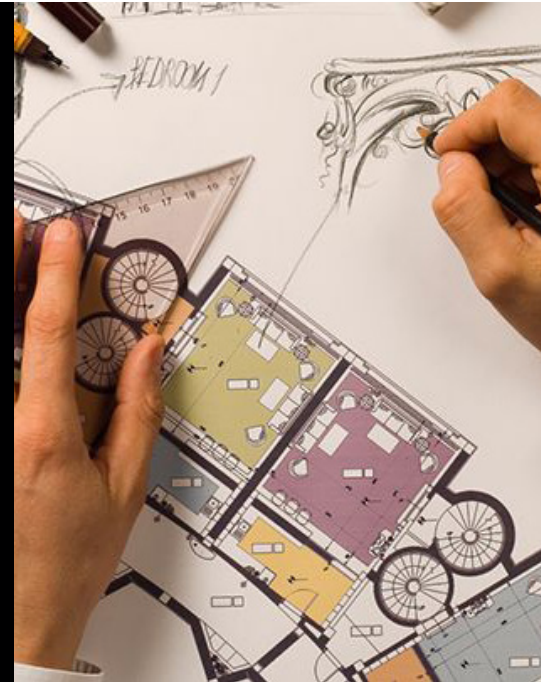

Interspazio Contract is a kind of a laboratory where ideas are compared and developed to become something tangible, winning the challenge of being in step with contemporaneity, that is constantly changing at full speed.

Interspazio Contract has a team of architects and designers who, through a synergic work, give birth to creative and practical solutions, targeted to simultaneously combine quality and practicality.

The success of Interspazio Contract is due to the attention to the major market trends, without forgetting the importance of the Made in Italy style, always a warranty of success.

The highly qualified and selected staff will be able to operate in all phases of work and for all types of interventions, respecting guidelines and deadlines without forgetting about quality.

The work of Interspazio Contract is strongly affected by the typical lines of Made in Italy, but also of foreign influences, thanks to avant-gardes that inspires them.

OUR SERVICES

SELECTION
